Client Use Case Scenario

Supplier Use Case Scenario

User Test Case Scenario

Find Nearby Food Sources

- GPS should detect current location
- FSMS should find food sources near current location
- UI display map with nearby food sources
- Client should be able to filter based on category of food
- GPS should give directions to selected food source

Supplier Test Case Scenario

Register New Food Source

- Supplier should be able to input food source info
- Supplier should be able to add food category.
- FSMS should store information in DB
- FSMS should be able to retrieve all food sources created by supplier.
